

CAREER SUMMARY

I am passionate about creating user-centric web and mobile solutions with a strong background in Javascript, Angular and VueJS. My previous experience as a Graphic Designer coupled with my degree in Information Technology has allowed me to create and develop many products, websites and applications.

WORK EXPERIENCE

Senior UI Designer / Developer

Nookal • May 2019 - Current

Responsible for the UI and UX of the Nookal Platform, whilst improving processes, working with developers and ensuring solutions fit the needs of our clients. Mockups are created in Figma and development is completed with a mix of React, Javascript, PHP, HTML and SCSS.

UI Developer

TrademarkVision • December 2017 - May 2019

Developed and designed products by working with clients to maintain and manage their trademark and patent data. Wireframes are produced in Sketch and Illustrator, development is completed with VueJS, HTML and SASS.

Product Developer / Designer

Ladbrokes • January 2017 - December 2017

Producing wireframes and designs, conducting analysis and developing prototypes to improve the range of Ladbrokes owned websites and apps. Prototypes and production code were developed using Angular, HTML, CSS/SASS and PHP.

Web Developer

International Education Services • Jan 2015 - Nov 2016

Designed and developed a range of educational websites and apps with a strong focus on the end user. Websites and apps were developed using CSS3, Ruby on Rails, HTML5, JavaScript and included libraries and frameworks such as JQuery, Angular and Ionic. Responsible for conceptual designs and wireframes, whilst providing guidance to developers.

Web Developer

Stocks Appliances • Jan 2014 - Feb 2015

WordPress website redesign, maintenance and SEO strategies.
